

BHEL secures order for setting up 1x800 MW Supercritical Thermal Power Plant in Telangana

New Delhi, February 14: Bharat Heavy Electricals Limited (BHEL) has secured an order from Singareni Collieries Company Ltd. (SCCL) for setting up the 1x800 MW Adilabad supercritical thermal power project in Mancherla district, Telangana on EPC (Engineering, Procurement & Construction) basis.

Under this contract, BHEL's scope of work includes design, engineering, manufacturing, supply, erection and commissioning, along with civil works. The scope also includes supplying highly efficient, state-of-the-art equipment for emission control.

The proposed unit is to be established adjacent to the existing 2x600 MW units which are in operation. Significantly, these units were also entrusted upon BHEL for Boiler-Turbine-Generator (BTG) scope and both units were commissioned by BHEL in 2016.

Notably, BHEL has successfully installed more than 75% of the coal-based sets for various utilities in the state of Telangana.

As India's foremost power equipment manufacturer, with over 1,70,000 MW of utility power capacity installed across the country, BHEL continues to play a pivotal role in bolstering India's energy security and supporting the vision of self-reliance in the power sector.
