BHEL commissions another 195 MW Thermal Unit in Bihar

Continuing its project commissioning momentum, Bharat Heavy Electricals Limited (**BHEL**) has successfully commissioned another 195 MW thermal unit in Bihar. This is the second 195 MW unit to be commissioned by **BHEL** at the 2x195 MW Muzaffarpur Thermal Power Station (TPS) Stage-II of Kanti Bijlee Utpadan Nigam Limited (KBUNL), a joint venture of NTPC Ltd. and BSPGCL, in Bihar. The first 195 MW unit at Muzaffarpur TPS Stage-II was commissioned earlier by **BHEL** in March 2015. **BHEL** is the leading supplier of coal-based main plant equipment to NTPC and its joint ventures, with an over 80% share in their installed capacity. **BHEL's** scope of work in the Muzaffarpur project envisaged design, engineering, manufacture, supply, erection and commissioning of Steam Turbines, Generators and Boilers, along with associated Auxiliaries and Electricals, besides state-of-the-art Controls & Instrumentation (C&I) and Electrostatic Precipitators (ESPs). Earlier, in the 1980s, **BHEL** had executed two units of 110 MW each at this project, which are still operational. The successful commissioning of these units has reinforced **BHEL's** proven capabilities in execution of thermal power projects involving supply of state-of-the-art equipment, suited to Indian coal and Indian conditions.
