

## Message

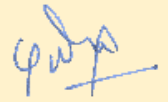

I am happy to note that 'Vigilance Awareness Week-2022' is going to be observed from 31<sup>st</sup> October to 6<sup>th</sup> November, 2022 with the theme “**भ्रष्टाचार मुक्त भारत - विकसित भारत (Corruption Free India for a developed Nation)**”.

The Vigilance Awareness Week is a week for expressing our commitment for spearheading the fight against corruption and in disseminating awareness amongst the employees and all stakeholders about vigilance and ethical governance. It also reassures that being vigilant doesn't mean being less profitable. This year's theme gives us a message to combat corruption on the path of making India a developed Nation.

For an all-inclusive growth, it is our responsibility to undertake the activities encircling good governance and implementing effective control measures. This would essentially require the active involvement of all stakeholders with zest and zeal.

I appeal all the BHEL employees and our stakeholders to put in best efforts to increase awareness about Vigilance and to inculcate ethical work practices in their conduct of business.
