President of Sudan Inaugurates Largest Thermal Power Plant in Sudan, set up by BHEL

New Delhi, February 5: Bharat Heavy Electricals Limited (**BHEL**) built Kosti (UM DABAKER) Thermal Power Plant (4x125 MW), the largest thermal power plant of Sudan, was inaugurated by His Excellency Omer Hassan Ahmed El-Basheer, President of Sudan. Mr. Atul Sobti, CMD, **BHEL** and senior officials of the Govt. of Sudan, **BHEL** as well as the Indian Embassy in Sudan were present on the occasion. Located in Kosti, Sudan, **BHEL** has executed this 500 MW project comprising 4 units of 125 MW each, on Engineering, Procurement and Construction (EPC) basis, having designed, manufactured, supplied and installed the complete power project including associated civil works. Significantly, this is **BHEL**'s largest oil-fired thermal power plant in the overseas market and also **BHEL**'s first crude-oil fired thermal power plant in Africa. The project comes close on the heels of the successful completion of **BHEL**'s 28 MW Nyaborango Hydro project in Rwanda which was recently inaugurated by H.E., the President of Rwanda. In addition, **BHEL** has also recently commissioned 2x20 MW Steam Turbine and Generators for cogeneration application at Tendaho Sugar Factory in Ethiopia. **BHEL** has been present in the African continent almost since its export journey commenced about 40 years back and has references today in almost half of the African continent. Notably, **BHEL** today has a presence in 78 countries across all the six continents. As an integrated power plant equipment manufacturer with over 50 years of experience and having installed over 157 GW globally, **BHEL** is currently engaged in the execution of all types/range of power equipment, be it Thermal, Gas, Nuclear, Hydro or Solar.
